AutoCAD

AutoCAD Serial Key has been superseded by other CAD programs, but is still widely used in the field of architecture, engineering, and construction. Because of its relative simplicity, AutoCAD is particularly useful to software developers, system administrators, and those with no prior knowledge of CAD. At launch, AutoCAD was available as both a disk-based and disc-less version for the Apple II and the Commodore PET. The disc-based versions of AutoCAD used a Microsoft 5.25" floppy drive while the disc-less version was compatible with the 3.5" floppy drive. AutoCAD was a significant advancement in CAD software. It allowed users to import data from another software package, edit data with graphics and text, and output printed or electronic documentation. AutoCAD also supported several 2D and 3D plotting formats. AutoCAD is used by different fields and industries including engineering, architecture, construction, manufacturing, and the internet. History AutoCAD was originally designed by Rick Summerhays. In 1982, Rick Summerhays started AutoCAD as an internal graphics tool for the office of the Chief Executive Officer (CEO) at the now defunct Parker Pen Company. Rick Summerhays brought the AutoCAD application to Steve Jobs at Apple Computer, Inc. in 1983, and on October 26, 1984, AutoCAD made its public debut as a disk-based version for the Apple II. At that time, the disk version sold for \$1000 and was named AutoCAD 3.0. AutoCAD 3.0 was a major upgrade and was the first commercial CAD program to use bitmapped graphics, an innovation pioneered by the Xerox PARC Research Center. In 1985, Steve Jobs discontinued sales of the Apple II, and with the financial failure of the Parker Pen Company, AutoCAD was no longer needed at Apple. AutoCAD was then transferred to the new Autodesk. The disk-based version of AutoCAD was renamed AutoCAD Version 2.0. In 1986, the United States Postal Service (USPS) used a program developed by Autodesk called PostCAD to assist in the design of new mail cars. These new mail cars were designed for greater safety and security, required by a law passed in 1974 known as "The Hazardous Materials Transportation Act". In 1987, this was updated to become known

Rory Macdonald Rory Macdonald (born 23 September 1995) is a Scottish professional footballer who plays as a defender for League One club Raith Rovers. Macdonald began his career at Celtic and played for the club's academy. He left in 2012 and trained with English club Leicester City before signing with Celtic's opponents, Motherwell. Macdonald signed for Ayr United in July 2014. He moved to Greenock Morton in June 2016 and was loaned to Stranraer in January 2017 before moving to Raith Rovers the following summer. Career Celtic Born in Glasgow, Macdonald attended St Ninian's High School. A product of Celtic's youth academy, Macdonald never made a competitive appearance for the club's first-team. He was released by the club in May 2012 and signed for Leicester City. Motherwell On 23 August 2012, Macdonald signed for Scottish Premiership club Motherwell on a two-year contract. After playing two times in all competitions, Macdonald was told he would not be offered a new deal. Ayr United On 3 July 2014, Macdonald signed for Ayr United. Macdonald scored on his league debut for Ayr on 6 August 2014, a 4–1 defeat to Hibernian at Tannadice Park. He became a regular in the side, playing a total of 41 times and scoring once. Greenock Morton Macdonald signed for Greenock Morton on 18 June 2016 on a two-year contract. After signing for Morton, Macdonald stated that he was looking to improve his defensive play and become a more physical presence on the pitch. At the end of the season, Macdonald won the Morton Player of the Year award. Macdonald scored his first goal for Morton in a 3–1 win over Ross County on 22 August 2017. On 5 October 2017, Macdonald was again awarded the Player of the Year award at the end
