The app is available in the App Store as well as Google Play Store for Android devices. This is a universal app, which means that it supports all devices running iOS or Android 4.0 or newer. It supports 1080p playback, and there are three user-definable modes: • HD Video Quality: this mode is designed to deliver the most visually appealing experience; • Original Quality: this mode delivers an excellent audio-visual experience, while the file size is smaller; • Settings: this mode is the most conservative, so it delivers a consistent audio-visual experience without being too distorted. The app offers several features: • You can edit subtitles by manually creating the subtitle file or using automatic text recognition; • You can use Google Chrome to browse the web; • You can share videos through social networks and e-mail. If you prefer using a remote control to navigate through the app, you can control your video playback from your Mi Home app. Just tap the button to start playing, pause or skip ahead. You can also use the app to browse other Xiaomi apps in the Mi App Store by tapping the Menu button in the top-left corner. Download Mi VIVID for iOS or Android from the App Store or Google Play Store. Mi Smart Home app The Xiaomi Smart Home app, also known as Mi Home, is a remote controller that lets you control all of your Xiaomi devices from anywhere in the world. The app runs on both iOS and Android devices, and it's available in Google Play and the App Store. The app offers several features: • You can pair your Mi Home app with up to three smart devices using a single app; • You can control all of your smart devices using an all-in-one remote controller; • You can use voice commands to control your smart devices; • You can add devices to your Mi Home app; • You can connect the app to a Mi Home Hub; • You can browse other Xiaomi apps in the Mi App Store from within the app. You can learn more about Mi Home from the Mi Home Help Center. What's New In Mi-360?

mi-360 is an open-source utility that provides Xbox 360 controller emulation for the Xiaomi Gamepad. It enables you to use this device in any application or game that supports Xbox controllers, and it even offers vibration support. All third-party trademarks are property of their respective owners in the U.S. and other countries. 6-axis motion control can also be detected from the infrared port to achieve precise motion control. Since pretty much any modern game offers support for XInput-compatible devices, you should be able to play any of them without issues. The installation process involves following a series of simple steps. ViGem drivers are required for the application to function correctly, but they are installed automatically during the setup process. Once launched, mi-360 is minimized to the system tray and hides the Xiaomi Gamepad from the system, showing only the emulated Xbox 360 device. Since pretty much any modern game offers support for XInput-compatible devices, you should be able to play any of them without issues. The application runs quietly in the background and can be accessed from the system tray. No configurations are required, and you can close it by simply right-clicking the tray icon. I have written software for the XIO game controller before so I know what to expect. XIO's drivers should be installed automatically on any system supported by Mi Home. I have installed XIO drivers on a brand new Windows 10 system and it has worked perfectly. If you know what to expect, you'll find the rest of the experience to be a joy and a relief. Great software! I am so happy to have this software. I had an old school 360 controller with defective buttons and you would need to change up the software every time it is used. With this app everything works perfectly! Also the support on here is fantastic and always there to help me with anything I have questions about! XIO software fantastic for PS4. I had so many problems with PS4 XIO software but now it is working perfectly after updating drivers and XIO software on PS4. I installed this software on my Raspberry pi 3 and I am now using this software on my device. Great software! I am so happy to have this software.
