New User Account By default the maximum personal money you are able to spend is currently bound to the sum of all your character's levels. If you upgrade your character before its maximum money level is reached, it's personal money sum will be increased to the amount of money you have gained in the process. For levels below 110 the personal money sum is set to the minimum amount required for each of the character's attributes (previously the personal money sum was 100 for all the attributes). Should the character's money level grow beyond the max, then the current money sum will stay at its present value. You are able to increase the personal money sum manually by using the personal money amount menu option. New

System Requirements For WYSIWYG BBCode Editor:

The official Quake 3 Pre-Alpha: Crumbling Highlands only requires a system with a P4M800 or P4M800 SE (Core 2 Duo, but other P4 CPUs should work fine too), and 128MB of RAM. The release itself contains two different Linux version, one for the "Voodoo1" and one for the "Voodoo3" based hardware. The release also contains three different Windows XP versions, which you can download in the releases section of the download page. Q3PAHREALM is a Quake
