CHICAGO (CBS) — As the presidential campaign heads into the final week before Election Day, a CBS 2/Bold

Command poll finds a tight race nationally, but the latest CBS 2/Bold Command Poll has Illinois in play for President Obama. CBS 2 political analyst Charles Steele has been watching the dynamics of the race for days. “This race is not just being decided by getting a certain percentage of the vote,” Steele said. “It’s about the number of votes.” And, Steele says, that’s why Obama’s performance in Illinois is so important. “For a guy to come into Illinois, in the last two weeks, with a poll of 49 percent in the statewide poll and he’s up by almost 10 points in some precincts – that’s got to be a worry,” Steele said. “Because this is the first time that the president has been this good in Illinois.” The poll showed Obama up by nine points among likely voters, 48-39. The Document Theme is the way you organize your files and the Document Symbol represents the kind of data in the file.

Document Symbols are used to store data within the file. The document theme is a container for all of the symbols and the hierarchical relationship between those symbols. For more information about this change, see this article on the official Autodesk blog: [Help! What is the difference between a “Dictionary” and a “Document” in AutoCAD? With the new Feature Set: Drafting, you can add a “Document” for each layer and save them with a unique name. If you have multiple “Documents”, they don’t have to share the same name. In previous versions, a “Dictionary” is a document with all of the drawing elements and shapes already drawn, which can be used to create multi-layer drawings. In AutoCAD 2023, the term “Document” will replace the term “Dictionary”. These changes will affect your workflows and document types.
