Rising from the ashes After missing out on the World Cup in Brazil 2014, a new FIFA enters a new generation of consoles: “We’ve been at the cutting edge of the game engine for some time now,” says producer Fabio Capello. “With FIFA 15, we have been looking for game balance, the way we play the game and the way we score. This year, we want to put back the passion in the game. We’ve heard players’ feelings and they want more drama, more intensity. We have more players and more goal opportunities, which means that the game will be more entertaining. “ New to FIFA 16, the UEFA Champions League has returned with the revamped UCL Attacking Intelligence System. This goal-oriented system shows how and when your team is most effective. The update increases intensity at decisive moments, regardless of your tactics. UCL Attacking Intelligence System For the first time in the series, dynamic weather conditions will influence your game. Climate conditions will affect everything from quick passes and free kicks to certain ball skills and drop-downs. In addition, the set-piece game now offers more chances and more defensive options than before, and allows the use of a more intelligent “Pick and Pass” system – while creative players can also use the “Pick and Shoot” system to score. FIFA 16 introduces “FIFA Ultimate Team”. Players can now collect, upgrade and expand their EA SPORTS FIFA 16 Ultimate Team squad. But how does this change the game? “What we’ve done is let the player really engage more,” says game director Christian Andersson. “When you build your team and play matches, you want to look good, and you want to win. You want to see the numbers moving on the screen. We’ve brought that back in a big way.” FIFA Ultimate Team The FIFA 16 console launch will include three additional game modes: “Career,” “Training” and “Concacaf Nations League”. For the first time, players will train at stadia and receive coaching instructions using on-screen prompts. The new “Concacaf Nations League” mode, which will be exclusively playable at the FIFA 16 console launch on the European, African and American territories, will be playable online or offline.
