Transforming growth factor-beta (TGF-beta) is a major regulator of extracellular matrix (ECM) synthesis. TGF-beta acts by binding to cell surface receptors that signal through the Smad pathway, leading to the synthesis of procollagen and other ECM proteins. TGF-beta has been implicated in the pathogenesis of renal fibrosis in a number of animal models. In the unilateral ureteral obstruction (UUO) model of renal fibrosis, TGF-beta is a key regulator of both parenchymal and renal interstitial ECM protein synthesis. Activation of Smad is a necessary requirement for induction of these processes. Other groups have identified the expression of the TGF-beta receptors in the tubular epithelial cells, and suggested that TGF-beta receptors could be activated locally in this tissue. Indeed, in other situations, TGF-beta expression has been shown in renal tubular cells. One may speculate on the pathophysiological significance of these observations, particularly with respect to interstitial fibrosis in the remnant kidney model of chronic renal failure..05 13.04 ± 2.32 13.10 ± 2.49 0.97 Values are presented as mean ± standard deviation. I am a huge RPG fan. One of the characteristics I like about them is the story and you are the main character who plays as the hero. It's a lot of fun to role play with friends.

Fantasy novels are great as well but when I read/watch them I feel like I'm getting sucked into another world and that's where I lose my interest.

RPG has a completely different experience for me (and I hope that it is enjoyable for others too).

The background music is great and the gameplay is fun just for itself. For someone like me, the pictures, video, maps and other designs are perfect.

The fantasy world is beautifully done so I love playing the game.

Even though it's a fantasy role-playing game, I really enjoy it.

The main character doesn't look like a typical RPG character with all of the high-tech armor; I like that he looks more like the Tolkien version. This makes me feel more comfortable playing as him.

The first time I played the game I couldn't figure out how to do anything; after a lot of struggling I figured it out and having done so, I was thrilled.

Every time I play the game, I keep expecting something unexpected to happen.

Entering the dungeon felt like being in the middle of a war instead of a game.

There are numerous ways you can play or make your own adventure. The game is huge, so I can easily play it for hours.
