My code was accepted (I did my best), but two examiners thought I could've done better. Here's the assignment: Write a function called longest_left_mismatch, which takes as input a string and returns the index of the first character in the string at which there is the most difference from a character in the string on the left and a character in the string on the right. Your function should iterate over the string exactly once, and should return -1 (the real longest_left_mismatch) if there are no differences, otherwise it should return the index of the first character in the string at which there is the most difference from a character in the string on the left and a character in the string on the right. Sample Input/Output: longest_left_mismatch("", "") -> 0 longest_left_mismatch("", "aab") -> 0

- The 10 Best RPG games for iPad and iPhone The iPad is a great device for getting your RPG fix. You can carry an entire game library on your iPad as games run either on your iPad or online in the cloud. An all-in-one experience such as this is the perfect way for you to be immersed in the RPG realm. Here are some of my favorite RPG titles for the iPad that I really recommend. 1. Divinity: Original Sin: Enhanced Edition How else can you describe a game that lets you play as a bard? It has stellar visuals, fantastic visuals, game design, story, and dialog are all fantastic. This enhanced edition has new additions to the story, new areas to explore, and the ability to play as a bard. An absolute must buy game. 2. Dungeons of Dredmor Dredmor is by the same designer as Reaper, and it's an absolute steal at only \$3.99. It's reminiscent of classic RPGs, but it combines new worlds, new monsters, and new abilities with the creativity of a designer who did over 400 hours of work on the game. Pick this one up. 3. Torchlight II Torchlight is one of the most celebrated RPGs of all time, and the sequel Torchlight II will let you know exactly why. What made the original is back, improved and expanded, but its a simple game that can be picked up and played in a matter of minutes. 4. Stencyl If you want a game that has a little bit of everything, check out Stencyl. This game has two games in one, as it's a twin-stick shooter as well as a platformer. It's great for a quick game that can be completely finished in about 3-5 hours. 5. Tower of Guns Tower of Guns is an awesome physics based shooter that combines tower defense gameplay with the destruction of a city. You control a tower, which you must strategically place over a base of your choosing. This game is a little bit puzzle and strategic, and if you love strategy or tower defense games, this is a great game to get your fix. bff6bb2d33

What's new in Elden Ring:

" the first word when you are in a duet with just one person and she really can't hear you till it's over. Especially if you are hyperconscious about sound. And I really can't stand the metal/"shocking pink" nose of RHONDA. I find it annoying. I'm faiRed out. I love the illustrator. I love the color and the polish. But the latest trailers are making me think that the game looks like it's going to be fine and still very well-polished, but that's been the case since early 2015 when my impressions seemed good: @ youtubeu/0no31u78rus I might be wrong, but wouldn't "the Elder Scrolls Online" already be a problem with regard to the copyright, or was this a trademark only? If I'm not mistaken these games have been out for more than 5 years now, IIRC? Probably similar to Wizards of the Coast, which owns Dungeons and Dragons, and their like, TM'd domain is - I believe - everywhere they list their product or game under the same name. The similar thing is the case with Bethesda on their standalone games as well. So, some recent stuff (which can already be announced again) could be reused in something else at a later point. Right now it's just an idea. Also, I know that they officially back us on piracy (meaning no pirate in-game copies), so if it doesn't infringe and just looks similar, they would never care. I have been a long time Elder Scrolls fan. Elder Scrolls 5 was my first bet for a new gaming experience for PC. The game itself was very solid and was a game changer when it came to online games and all that. What disturbs me though is that Bethesda seems to start adapting their engine to new franchises which they dont own (just heard that the quest for Darksiders 3 doesnt even use their engine)....I guess that is just a rumor to try and get more people to buy it right? I say start a spin-off game of a series that already has a ton of brand recognition which would get a better reception in my opinion. I know that you dont have to make too many changes from the original but it would save the brand. They wouldn't even need a new engine

Despite increasing awareness of the high mortality of this infection, optimal therapy has not been established. Furthermore, a vaccine is not currently available. The antifungal agents currently used in humans all have severe toxicity profiles and are not able to clear the infection. The optimal therapy for these infections remains a medical enigma. We have developed new experimental treatments against cryptococcal meningitis, which are based on an understanding of the mechanisms of *Cryptococcus* spp. virulence. The first approach is aimed at the membrane-drug efflux pumps of this organism. These pumps are the targets of novel lipophilic cation drugs currently in early clinical trials. These have no significant toxicity, and are fungicidal against *Cryptococcus* spp. in vitro. The primary target of these drugs is the P-glycoprotein (P-gp). The second approach is based on the finding that TNF-1 and related molecules prevent the synthesis of cryptococcal extracellular matrices (ECMs). We are testing the efficacies of inhibitors of the tryptophan-tRNA synthetase, as well as antibodies directed against the matrix. We are also exploring the possibility of synergism in the
